

# POCKET CUTTER STANDARD

## Product Description

Product damage is a persistent issue faced by warehouses and retailers; and commonly, the problem lies in the box/strap cutter. The Easy-Cut range is specially designed to protect your product from damage, ensure the safety of users while opening cardboard boxes and cutting composite straps. Easy-Cut's industrial German-made blade and sturdy handle makes it more durable than other cutters.

This handy box cutter fits comfortably in the palm of your hand, safely in your pocket or attached to your pocket with the built-in pocket clip just like a pen. The high-strength steel utility blade slices through cardboard easily and cuts over 5000 feet of material (800 boxes on average)! Discard when the blade is no longer providing a sharp cutting surface.

Dual safety features of this knife include a small secondary trigger button inside the main trigger mechanism that must be squeezed in order to activate the blade. This prevents the blade from extending while not in use, allowing safe storage in pockets, drawers, tool boxes, etc. Release the trigger and the blade automatically retracts to its original locked position. A built-in safety return also overrides the trigger function and enables the blade to retract when removed from the cutting surface.

## Key Features

- Auto-retract
- Ambidextrous
- Built-in trigger lock
- Ergonomic, lightweight
- High-strength steel
- Refined utility-type blade
- Safe storage

## Industries Served

- Food and Beverage
- Furniture and Fixtures
